PRESS RELEASE FOR IMMEDIATE RELEASE

Springfield Architect Earns LEED Accreditation

(Springfield, MO) – Travis Tindall, an intern architect with Butler, Rosenbury & Partners recently earned his LEED Professional Accreditation.

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ is the nationally accepted benchmark for the design, construction, and operation of high performance green buildings. LEED gives building owners and operators the tools they need to have an immediate and measurable impact on their buildings' performance. LEED promotes a whole-building approach to sustainability by recognizing performance in five key areas of human and environmental health: sustainable site development, water savings, energy efficiency, materials selection, and indoor environmental quality.

LEED Professional Accreditation distinguishes building professionals with the knowledge and skills to successfully steward the integrated design and LEED certification process.

LEED Accredited Professionals have demonstrated a thorough understanding of green building practices and principles and familiarity with LEED requirements, resources, and processes.

Tindall is a Springfield resident, having graduated from Drury University in May 2006 with a Bachelor's in Architecture. He has worked for BR&P since then.

Butler, Rosenbury and Partners is an architectural and engineering design firm celebrating its 30th anniversary. Located in Springfield, Missouri, the company has more than 60 employees and recently opened offices in Phoenix, Arizona and Dongguan, China.
